## QUBICAAMF PINSPOTTER LEADERSHIP

When it comes to pinspotters, no one has more experience than QubicaAMF.

Our journey began in 1946 when we introduced the first automatic pinspotter, a revolution that powered the large-scale growth of bowling.

In 2002 we introduced our first string pinspotter, making it easier to include bowling in more places than ever before. Today, with over 8,000 string pinspotters installed worldwide, we have the largest install base in the industry.

More customers choose QubicaAMF pinspotters because they are simply the best choice available.

We are on a never-ending journey to innovate our pinspotters and to ***make bowling amazing.***

## WHY WE CREATED EDGE STRING

The bowling business, operator needs, and technology have changed since our first string pinspotter was introduced in 2002. We recognized the need to reinvent the string pinspotter to align better with the needs of today's bowling operators and investors.

String pinspotters solve some of the cost and complexity challenges of traditional pinspotting equipment. However, today's string pinspotters are not as simple and worry-free as they need to be, nor do they provide the best bowling consumer experience.

In response, QubicaAMF spent over 3 years and thousands of man-hours to develop a revolutionary new string pinspotter...
